How to get integration

Interviews

The following 6 minutes will show answers to the questions about integration given by students of our school, Weiterbildungskolleg der Bundesstadt Bonn.

Round about 70% of our students have a migration background. Our school is the last chance and the only way to get a school exam in our country. We are a school of the second path, i.e the students have finished their 10 years at school and can come to us as soon as they are 16 years old.

There are different reasons why they couldn't finish in the regular time. Often the language knowledge was not enough yet. But there are other reasons too.

So a young man tells us that one day he lost the right way. The youth court decided that he should go to school instead of a prison. A wise decision. Here at our school he could finish his exam and had so a real chance for integration in our society.

One day a young lady speaks about the huge problems she had at her school during the pregnancy. She left the school without finishing an exam. The baby is now 1 year old and she has in our school a chance for integration. Social workers here made for her a special schedule and take care about the surroundings of her baby. She is happy now because she has a real chance for integration.

Our students made the questions for the interviews and talked about them with the other students.

American students of the AIB (Akademie für Internationale Bildung) helped us to make the film. We don't have at school the necessary equipment. Thanks to them all.
